Let's rethink our waste.

shaping.banyule.vic.gov.au/FogoTrial

Did you know that more than half of the waste that goes to landfill in Banyule can be composted?

That's food scraps, garden waste and organic matter that could be turned into sustainable compost for our community's gardens, literally going to waste.

So, let's rethink our food waste, together.

What's changing?

Over the next 8 weeks, starting from October 4, you and your neighbours will be part of a trial food organics and garden organics (FOGO) waste service.

As part of the trial, your green garden waste bin will now be used for your **food and garden waste**. We'll collect it **weekly** and then turn your waste into nutritious compost.

This will mean you have less waste going into your landfill bin, so your landfill bin will now be collected fortnightly. To make this as easy as possible, in late September you will receive a new, larger landfill bin to replace your current 80L bin.

Where can I find out more?

Before the trial starts, you'll receive a full information pack with all the details on what you need to do. For this trial, there will be no cost to participate.

We'll also be hosting online information sessions so that you can have all your questions answered. Due to Covid restrictions, these will be conducted online via Zoom.

- Saturday 11 Sept at 10am
- Tuesday 14 Sept at 2pm
- Saturday 18 Sept at 10am
- Wednesday 22 Sept at 7pm

To register for one of the online information sessions, please visit shaping.banyule.vic.gov.au/FogoTrial or scan the QR code on this letter so we can provide you with the Zoom details.

More information will be coming to your letterbox in September.

If you have questions or queries, please visit shaping.banyule.vic.gov.au/FogoTrial, email letsrethinkourwaste@banyule.vic.gov.au or call 9049 3355

Together, let's rethink our waste.
